

Framed Cabinetry Construction

Shiloh's cabinet construction for our face frame product

is an example of the commitment to long-term durability. Our cabinet features quality components and construction methods throughout. Compare our cabinet construction against the competition and you will see why Shiloh Cabinetry stands out against the rest.

1. Solid wood hanging rail for secure fastening to wall
2. Solid wood corner blocks in base cabinets add strength and stability
3. $\frac{3}{4}$ " dovetail plywood drawer
 - dovetail hardwood drawer upgrade available
4. Blum® Solo undermount drawer guide
 - Blumotion® full extension, soft close guide required with flush or beaded inset, otherwise it is available as an option with standard or full overlay and $\frac{3}{8}$ " inset
5. Solid wood door (except METRO door, thermafoil and some painted products)
6. Durable and easy to clean interior
7. $\frac{3}{4}$ " plywood adjustable shelving with solid metal shelf clips
8. $1\frac{1}{2}$ " wide solid wood frames
9. $\frac{3}{8}$ " plywood top (on wall cabinets) and bottom
10. Catalyzed conversion varnish topcoat that is smooth and very durable and resistant to most household chemicals
11. $\frac{1}{2}$ " plywood sides with $\frac{1}{4}$ " wood veneer (stained) or $\frac{1}{4}$ " MDF (painted) applied on finished ends
12. Blum® 6-way adjustable, concealed hinges in standard or full overlay and flush or beaded inset ($\frac{3}{8}$ " inset uses knife hinge)
 - Soft close hinge available as an option with concealed hinges in overlay or inset applications
